## Nail Polish

Over 100 Nail Polish Colours Available To Supplement Our Nail Gel Range

Bio Sculpture Nail Polish is fast drying, stable and durable. Our polishes contain double density fluorinated colour pigment to match our Colour Gels and will never need more than two coats. You can use the nail polish as a temporary colour change over your existing colour gels, until you desire to return to your original gel colour. Bio Sculpture UV gel nail polishes are available in all the colours of our colour gels. All nail polishes are toluene free, DBP and formaldehyde free.
